

## Introduction

The ISL6228LOEVAL3Z evaluation board demonstrates the performance of the ISL6228 dual-channel PWM controller. The ISL6228 features Intersil's Robust Ripple Regulator ( $R^3$ ) technology. Channel-1 output voltage is 1.5V or 1.8V, pending the state of switch S5. Channel-2 output voltage is 1.8V. Each channel has an on-board dynamic-load generator included for evaluating the transient-load response. It applies a 300 $\mu$ s pulse of 8A load across V<sub>O1</sub> and GND, and also a 300 $\mu$ s pulse of 8A load across V<sub>O2</sub> and GND.
